

## CLAIMS AMENDMENTS

1. (Currently Amended)      A method of implementing an electronic programming guide through a program receiver comprising:
  - providing access to a first electronic programming guide with a first set of program selections over ~~a first~~ an airwave broadcast medium;
  - providing access to a second electronic program guide with a second set of program selections over ~~a second medium~~ the Internet; and
  - enabling a user to select, over said ~~first broadcast medium~~ and ~~second media~~ the Internet, programs for viewing on said receiver.
2. (Original)      The method of claim 1 wherein said second set is more extensive than said first set.
3. (Previously Presented)      The method of claim 1 wherein providing access to a first electronic programming guide includes providing said first electronic programming guide over the first medium that also provides the program selections.
4. (Currently Amended)      The method of claim 3 further including providing electronic programming guide information back to the receiver through said ~~second medium~~ Internet without providing program content.
5. (Currently Amended)      The method of claim 1 further including automatically coupling the user to said ~~second medium~~ Internet upon receiving a request for access from the user.

6. (Currently Amended) The method of claim 5 wherein automatically providing access to said ~~second medium~~ Internet includes automatically accessing the Internet.

7. (Original) The method of claim 1 including enabling the user to program which program selections are provided in the first electronic programming guide.

8. (Previously Presented) The method of claim 1 including automatically providing said first electronic programming guide and providing said second electronic program guide in response to a user request.

9. (Currently Amended) The method of claim 1 further including providing tuning information to said receiver over said ~~second medium~~ Internet.

10. (Currently Amended) An article comprising a medium for storing instructions that cause a processor-based system to:

provide access to a first electronic programming guide with a first set of program selections over ~~a first medium~~ an airwave broadcast medium;

provide access to a second electronic program guide with a second set of program selections over ~~a second medium~~ the Internet; and

enable a user to select, over said ~~first broadcast medium~~ and ~~second media~~ Internet, programs for viewing on said receiver.

11. (Currently Amended) The article of claim 10 further storing instructions that cause a processor-based system to automatically couple the user to ~~said second medium~~ the Internet upon receiving a request for access from the user.

12. (Original) The article of claim 11 further storing instructions that cause a processor based system to automatically access the Internet in a response to request for access to said second medium.

13. (Original) The article of claim 10 further storing instructions that cause a processor-based system to enable the user to program which program channels are provided in the first electronic programming guide.

14. (Original) The article of claim 10 further storing instructions that cause a processor-based system to automatically provide the first electronic program guide and second electronic program guide in response to a user request.

Claims 15-30 (Canceled).

31. (New) The method of claim 1 including providing access to program guides on two different web sites.

32. (New) The article of claim 10 further storing instructions that cause a processor-base system to provide program guides on two different web sites.
